

Real Potatoes Ltd.

MOLLI

POTATOES for PEOPLE™

MOLLI

Utilization: Fresh market

Maturity: Early

- Tubers are brilliant yellow flesh.
- Skin finish is bright yellow with obscure lenticels.
- Dormancy is very good.
- Shape is round oval and very uniform.
- Yield potential under varied climatic conditions is stable and high.
- Resists:
 - Mechanical Damage and Internal Bruising.
 - Wart, PVY, and PVA
 - Nematodes RO1 and RO4
 - Hollow heart, second growth & growth cracks
- * Rather high resistance to Common Scab.

Molli does not present after cooking discolouration and due to shape uniformity easily fits a traditional Yukon Gold type production program. In terms of equipment handling and packing and for customers looking for that reliable supply of yellow fleshed potatoes, Molli could easily become the variety of choice and fill this important and growing market sector.
