# PACIFIC RUSSET

POTATOES for PEOPLE™

# PACIFIC RUSSET

Utilization: Fresh Market

Maturity: Med-Season

- Tuber size distribution is uniform
- Tuber deformities are rare
- Skin set is excellent
  - Within two weeks of vine maturity or top kill
- More drought tolerant than Russet Norkotah
- More drought tolerant than Goldrush
- Requires a good spray control program.
- Resists:
  - Common Scab
  - Verticillium wilt
- Susceptible to fusarium dry rot.

Pacific Russet is a high yielding, early maturing oblong russet fresh market cultivar with excellent tuber appearance and culinary quality
